Conquer Your Backlogs

https://my-site-vx42geej-sai497930.wix-vibe.com/

Batch starts from 24_11_2025 to 28_11_2025

Project overview

This project aims to build a simple chatbot that helps engineering students plan, study, and clear their academic backlogs. Many students struggle with multiple subject backlogs due to poor time management, difficulty understanding concepts, or lack of proper guidance. The chatbot acts as a personal study assistant by identifying the student's pending subjects and creating a customized study plan. It also recommends learning resources, explains concepts in simple terms, and gives revision tips.

Specifications

To assist students in organizing and managing backlog subjects.

To generate a personalized and realistic study plan.

To provide learning resources such as videos, notes, and important topics.

To explain difficult concepts in simple, easy-to-understand language.

To track study progress and motivate the student.

To provide revision tests, quizzes, and exam preparation strategies.

CONCLUSION

The Engineering Backlog Support Chatbot successfully provides a helpful digital assistant for students who struggle with pending subjects. The system simplifies the process of backlog preparation by offering personalized study plans, explaining difficult topics in simple language, and recommending useful learning resources.
